	Equity paradigms in the context of climate change	Aarti Gupta		
		Facilitator: Clara Brandi		
	Some have suggested that movements towards			
	justice require overarching shifts that extend			
	beyond specific institutions, jurisdictions or scales.			
	Broad paradigms about justice generally, or about			
	what "the problem is", shape how people have			
	come to think about what climate justice is and			
	what it requires. What paradigms offer potential			
	improvements for achieving justice in the context of			
	climate change? What would this look like and how			
	do we get there?
