

Proposal by Alsiddig Abdelsadig Faragallah

My proposal is a curriculum of climate and weather.

The proposer Mr. Alsiddig Abdelsadig Faragallah.

This proposal is an international innovative series curriculum, it must be teach as individual and isolated curriculum like mathematic, physics, chemistry. ...ext .

It divided into three levels: from level one to level three.

Level one targets the students from 7 to 13 years old .this level explains the climate and weather into a funny and simple ways, that can be more understanding by the students, using simple identification of its elements, the cartoon movies and toys with new actors, like Toom & Gery. to make the students motions like the climate and weather in its pure , helthey and nice picture. To acquire them to love the climate and weather.

Level two: targets the students from 14 to 18 years old, it shows and explain the climate components, the damages and destructions and causes of it, the evaluation and estimations of the damages, the ways that using to estimate, monitoring the climate changing from space by satellites, the conventions and agreements related to that issues and causes of miscarry, the roles played by the organisation and communities to success them. To acquire the students to know more about the climate and its problems, also to active them to do posotive actions.

Level three : targets the students above 18 years old and postgrauate and researchers, establishing of the specialized Colleges.

As a result of this series curriculum, the students should be with a very high skills and knowledge which can lead them to deal with the climate issues with professional ways.

This proposal must be press and distributes in all over the world as policy, and encourage all the governments to adopt it.

Thanks.

Alsiddig Abdelsadig Faragallah.
