

City of Avondale Greenhouse Gas Emissions Inventory

THE PROBLEM The City of Avondale wanted to understand its impact to the climate and enhance its sustainability program by inventorying greenhouse gas (GHG) emissions resulting from municipal operations.

THE PARTNERS City of Avondale

THE SERVICE Greenhouse gas emissions inventory and analysis

THE SOLUTION Global Services developed a custom GHG emissions inventory model for the City of Avondale that will provide actionable information for city managers to reduce GHG emissions from municipal operations in a cost-efficient manner.

THE OUTLOOK The initial GHG emissions inventory of municipal operations has the potential to expand to the a community-scale GHG emissions inventory for the City of Avondale, inventorying emissions from residential, commercial and industrial sources.
